Questions and discussion

Speaker: **Dr. EMILIANO RIPAMONTI**

Graduate in Medical Biotechnology, researcher and developer of methods of analysis at Abich Srl since 2013 and since 2015 is responsible for in vitro analyses on solar products. He collaborates with the Department of Pharmacology of the University of Milan at the San Paolo Hospital, as part of a research project. Develop in vitro methods for quantification of properties of solar, including analysis protocols for the characterization of resistance to solvents (water, salt water, sweat), for in vitro measurement of protection factors and for the assessment of protection against HEV and IR light, to validate the predictability of such methods compared to tests on healthy volunteers.
